

## Stop Breaking Bar Glasses In Your Chiller

The BeerKube is a new patented product that is used as a spacer between stackable glasses when they are stored in a glass chiller to *prevent them from sticking together and breaking.*

It is made using an FDA approved material that won't absorb moisture and can be cleaned in your dishwasher. It allows you to store more glasses in your chiller which means you can serve beer in cold glasses all night long.

Do you use a glass chiller?

Do you use stackable bar glasses?

Do you break glasses trying to separate them when they freeze together?

Do you want to optimize chiller usage?

If so, the beerkuba is for you.

Pictured left to right: 3 16 ounce pint glasses stacked with BeerKubes. True MFG 24" wide chiller with 20 stacks of pint glasses (100 glasses total), 2 stacks of Killians glasses, room for Stella and Pilsner glasses, and the stainless tray with 3 BeerKubes.

### Testimonials

We have had great success with the BeerKubes. We break less glasses and they work just like you said they would.

*Kevin Emlinger, CCM  
Food and Beverage Director  
The University Club of Boston, Boston, MA*

The Kubes are fantastic. What a great and simple idea. We never run out of cold glasses and never break glasses. Don't know how we lived without them.

*Jackie Hughs, Bartender  
The Boat House, Mystic CT*

The Kubes are a lifesaver. We always have cold glasses even in the big rushes. Can't remember the last time we broke one. I was skeptical at first but I am a beerkuba lover now.

*Tim Cochran, Head Bartender  
The DogWatch Cafe, Stonington CT*

The Kubes work great. I hated it when my customers would get a beer in a warm glass because we couldn't have enough glasses in the chiller. The BeerKube makes it easy. We never serve beer in anything but a cold glass now. We are Cold Glass Certified.

*Kevin Gilligan, Owner of Gilligans, Westerly RI*

### The benefits of using the BeerKube are:

**The BeerKube saves you time, money and hassle!  
It reduces glass breakage and increases capacity and flexibility of movement in your chiller.**

Increases capacity of your chiller by a factor of 4. This means if you had 20 cold glasses, you can now have 80.

Stops glasses from sticking together and breaking.

Allows for easy movement of stacked glasses without worrying about breakage. Easily move warm glasses to the back of the chiller.

Flexibility of movement allows for easy cleaning of the chiller, just remove the stack as one without worrying about glass breakage.

**We are so confident that you will like BeerKube that we offer a 30 day money back guaranty. Just send your order back for a full refund.**

Purchase the BeerKube at our secure PayPal store at [www.BeerKube.com](http://www.BeerKube.com)

You may purchase the BeerKube as needed:

Purchase the stainless tray that fits to front of your cooler that stores the Kubes.

Then select as many Kubes as you want or you may choose to purchase only the Kubes.
